Email: dhruv.kann@gmail.com

Updated 09/2026

EDUCATION

UC San Diego | B.S., Mathematics-Economics (*intended*), Political Science

Jun. 2028

Relevant Coursework: Econometrics, Linear Algebra, Intermediate Microeconomics, Data Analytics for the Social Sciences, Data Science and Causal Inference

Planned Coursework: Real Analysis, Probability Theory, Mathematical Statistics, Numerical Optimization, Differential Equations

RESEARCH EXPERIENCE

Research Assistant

Apr. 2026 – Present

School of Global Policy and Strategy, UC San Diego *La Jolla, CA*

Supervisors: Profs. Gaurav Khanna and Karthik Muralidharan

- Assist with econometric analysis and data visualization in R, including regression discontinuity and ordinary least-squares estimation across program-by-category admission cutoffs
- Perform reviews of educational economics (value-added) literature

Research Assistant

Jan. 2026 – Jun. 2026

Department of Political Science, UC San Diego *La Jolla, CA*

Supervisor: Tereza Petrovičová, PhD Candidate

- Compiled and analyzed solar and wind energy zoning regulations across multiple states, supporting comparative clean energy policy research
- Developed structured county-level dataset and coding frameworks to enable policy evaluation and cross-jurisdictional analysis
- Synthesized complex regulatory information into accessible research summaries

Research Assistant

Jun. 2025 – Sep. 2025

Travers Department of Political Science, UC Berkeley *Berkeley, CA*

Supervisor: Prof. Gabriel Lenz

- Compiled and analyzed historical datasets using `tidyllm` package in R to support research on social policy and racial violence
- Automated data extraction and cleaning of archival newspaper records using Gemini LLM API to create structured JSON

RESEARCH IN PROGRESS

Dhruv S. Kannan and Andrew J. Liang (2026). "Party-Line Heterogeneity in Costly Environmental Proposition Demand: Revealed Preference Data from California". Manuscript in progress.

POLICY EXPERIENCE

Public Policy Intern

Jun. 2026 – Aug. 2026

Ava Community Energy Authority *Oakland, CA*

- Developed fixed-effects regression modeling of power input instability in California energy market long-term forecasting, findings incorporated into reply comments in active CPUC proceeding

SKILLS & LANGUAGES

Technical & Data Stata, R (`tidyverse`, `ggplot`), TEX, Git, dataset compilation and cleaning, visualization, causal inference

Languages Tamil (intermediate), Japanese (intermediate), Spanish (conversational)
